

NATEF Task List - Medium/Heavy Duty Truck Hydraulics

Name: _____

Date: _____

For every task in *Hydraulics*, the following safety task must be strictly enforced: Comply with personal and environmental safety practices associated with clothing; eye protection; hand protection; proper lifting practices; hand tools; power equipment; proper ventilation; and the handling, storage, and disposal of fuels/chemicals/materials in accordance with federal, state, and local regulations.

The first task in Hydraulics is to listen to and verify the operator's concern, review past maintenance and repair documents, and determine necessary action.

VIII. HYDRAULICS		Week											
		1	2	3	4	5	6	7	8	9	10	11	12
A. General System Operation													
P-1	1. Identify system type (closed and open) and verify proper operation.												
P-1	2. Read and interpret system diagrams and schematics.												
P-1	3. Perform system temperature, pressure, flow, and cycle time tests; determine needed action.												
P-1	4. Verify placement of equipment /component safety labels and placards; determine needed action.												
B. Pumps													
P-1	1. Identify system fluid type.												
P-1	2. Identify causes of pump failure, unusual pump noises, temperature, flow, and leakage problems; determine needed action.												
P-1	3. Determine pump type, rotation, and drive system.												
P-2	4. Remove and install pump; prime and/or bleed system.												
P-2	5. Inspect pump inlet for restrictions and leaks; determine needed action.												

NATEF Task List - Medium/Heavy Duty Truck Hydraulics

Name: _____

Date: _____

For every task in *Hydraulics*, the following safety task must be strictly enforced: Comply with personal and environmental safety practices associated with clothing; eye protection; hand protection; proper lifting practices; hand tools; power equipment; proper ventilation; and the handling, storage, and disposal of fuels/chemicals/materials in accordance with federal, state, and local regulations.

The first task in Hydraulics is to listen to and verify the operator's concern, review past maintenance and repair documents, and determine necessary action.

B. Pumps (continued)		Week												
		1	2	3	4	5	6	7	8	9	10	11	12	
P-2	6. Inspect pump outlet for restrictions and leaks; determine needed action.													

C. Filtration/ Reservoirs (Tanks)		Week												
		1	2	3	4	5	6	7	8	9	10	11	12	
P-1	1. Identify type of filtration system; verify filter application and flow direction.													

P-1	2. Service filters and breathers.													
-----	-----------------------------------	--	--	--	--	--	--	--	--	--	--	--	--	--

P-2	3. Identify causes of system contamination; determine needed action.													
-----	--	--	--	--	--	--	--	--	--	--	--	--	--	--

P-1	4. Take a hydraulic oil sample for analysis.													
-----	--	--	--	--	--	--	--	--	--	--	--	--	--	--

P-1	5. Check reservoir fluid level and condition; determine needed action.													
-----	--	--	--	--	--	--	--	--	--	--	--	--	--	--

P-1	6. Inspect and repair or replace reservoir, sight glass, vents, caps, mounts, valves, screens, supply and return lines.													
-----	---	--	--	--	--	--	--	--	--	--	--	--	--	--

D. Hoses, Fittings, and Connections		Week												
		1	2	3	4	5	6	7	8	9	10	11	12	
P-2	1. Diagnose causes of component leakage, damage, and restriction; determine needed action.													

NATEF Task List - Medium/Heavy Duty Truck Hydraulics

Name: _____
Date: _____

For every task in *Hydraulics*, the following safety task must be strictly enforced: Comply with personal and environmental safety practices associated with clothing; eye protection; hand protection; proper lifting practices; hand tools; power equipment; proper ventilation; and the handling, storage, and disposal of fuels/chemicals/materials in accordance with federal, state, and local regulations.

The first task in Hydraulics is to listen to and verify the operator's concern, review past maintenance and repair documents, and determine necessary action.

D. Hoses, Fittings, and Connections (continued)		Week											
		1	2	3	4	5	6	7	8	9	10	11	12
P-1	2. Inspect hoses and connections (length, size, routing, bend radii, and protection); repair or replace as needed.												
P-1	3. Assemble hoses, tubes, connectors, and fittings in accordance with manufacturers' specifications; use proper procedures to avoid contamination.												
P-1	4. Inspect and replace fitting seals and sealants.												
E. Control Valves		Week											
		1	2	3	4	5	6	7	8	9	10	11	12
P-1	1. Pressure test system safety relief valve; determine needed action.												
P-1	2. Perform control valve operating pressure and flow tests; determine needed action.												
P-1	3. Inspect, test, and adjust valve controls (electrical/electronic, mechanical, and pneumatic).												
P-1	4. Identify causes of control valve leakage problems (internal/external); determine needed action.												
P-1	5. Inspect pilot control valve linkages, cables, and PTO controls; adjust, repair, or replace as needed.												

NATEF Task List - Medium/Heavy Duty Truck Hydraulics

Name: _____
Date: _____

For every task in *Hydraulics*, the following safety task must be strictly enforced: Comply with personal and environmental safety practices associated with clothing; eye protection; hand protection; proper lifting practices; hand tools; power equipment; proper ventilation; and the handling, storage, and disposal of fuels/chemicals/materials in accordance with federal, state, and local regulations.

The first task in Hydraulics is to listen to and verify the operator's concern, review past maintenance and repair documents, and determine necessary action.

Comply with manufacturers' and industry accepted safety practices associated with equipment lock out/tag out; pressure line release; implement/support (blocked or resting on ground); and articulated cylinder devices/machinery safety locks.

F. Actuators		Week												
		1	2	3	4	5	6	7	8	9	10	11	12	
P-1	1. Identify actuator type (single/double acting, multi-stage/telescopic, and motors).													
P-1	2. Identify the cause of seal failure; determine needed repairs.													
P-1	3. Identify the cause of incorrect actuator movement and leakage (internal and external); determine needed repairs.													
P-1	4. Inspect actuator mounting, frame components, and hardware for looseness, cracks, and damage; determine needed action.													
P-1	5. Remove, repair, and/or replace actuators in accordance with manufacturers' recommended procedures.													
P-1	6. Inspect actuators for dents, cracks, damage, and leakage; determine needed action.													
P-1	7. Purge and/or bleed system in accordance with manufacturers' recommended procedures.
